

Dr Farokh Master

Discussing a few remedies for Lung Cancer

Lung cancer

It is a very challenging cancer to treat. Cell type and stage are the most critical factors in determining the survival rate is the stage at the time of diagnosis. Those that are diagnosed at a localized stage may be curable.

Dr Farokh Master

[View lecture](#)

In this lecture Dr Farokh Master gives an introduction to the treatment of lung cancer with homeopathy, and then discusses a few homeopathic remedies (starting at 16min 20 sec.)

- *Acalypha indica*
- *Arsenicum iodatum*
- *Aranea diadema*
- *Cobaltum muriaticum*

- Anthracinum
- Kalium carbonicum
- Bleomycin

Bleomycin

From Wikipedia, the free encyclopedia

Bleomycin is a medication used to treat cancer.^[4] This includes Hodgkin's lymphoma, non-Hodgkin's lymphoma, testicular cancer, ovarian cancer, and cervical cancer among others.^[4]

Typically used with other cancer medications,^[4] it can be given intravenously, by injection into a muscle or under the skin.^[4] It may also be administered inside the chest to help prevent the recurrence of a fluid around the lung due to cancer; however talc is better for this.^{[4][5]}

- Trematis versicolor
- Lycopodium clavatum
- Natrium sulphuricum
- Stannum metallicum
- Manganum Aceticum
- Prunus spinosa
- Withania somnifera
- Helix tosta
- Saussurea lappa (Kuth root)

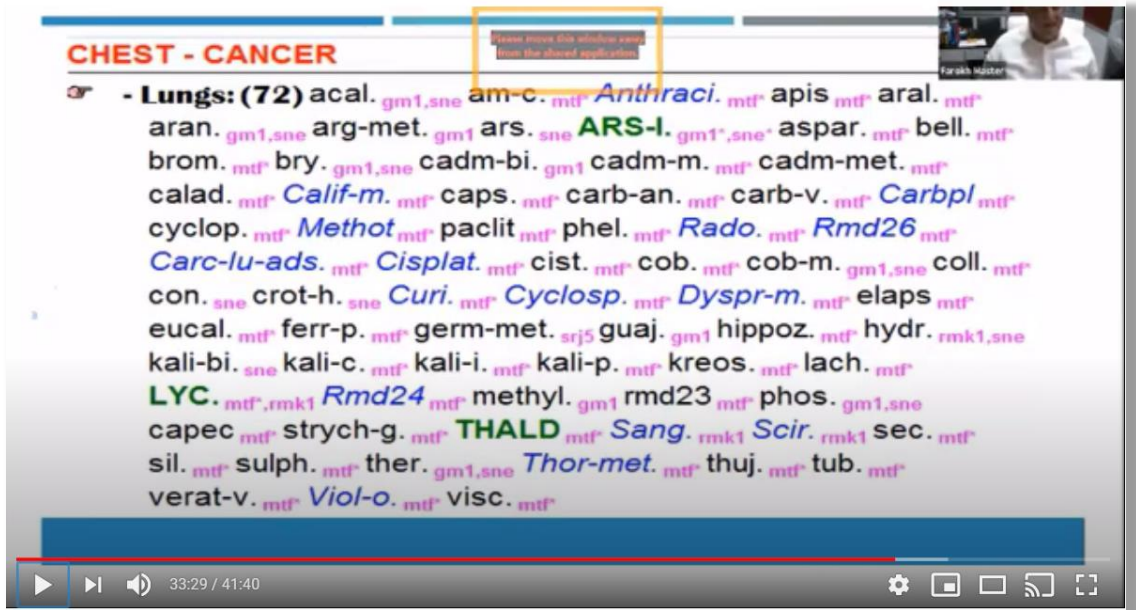

Saussurea costus

From Wikipedia, the free encyclopedia

Saussurea costus, commonly known as **costus**, **Indian costus**, **kuth**, or **putchuk**,^[5] is a species of thistle in the genus *Saussurea* native to India. Rishi (Hindu) mystics of Kashmir especially ate this plant. Essential oils extracted from the root have been used in traditional medicine and in perfumes since ancient times.^{[6][7]} *Saussurea Costus* falls within the Kingdom: Plantae, Phylum: Tracheophyta, Class: Magnoliopsida, Order: Asterales, Family: Compositae.^[8] The genus *Saussurea* comprises about 300 species in the world (Bremer, 1994) of which 61 species are found in India.^[9]

Aucklandia, also known as costus or *Mu Xiang*, is the root of the plant *Saussurea costus*. The root of the plant is the key part used for medicinal or homeopathic purposes.^[10] The root is also called by its Latin name *radix aucklandiae* (root of aucklandia).^[11]
