Introduction

Tutorial videos – A Quick Tour

The following tutorial videos will give an overview of the basic functions, so you will be able to work out your first case quickly. For more details see further in the manual.

Select in YouTube:

Full Screen
and
HD 720 or 1080 Quality

Introduction part 1

See video: [Introduction part 1](#)

- Table of contents of: Repertory, References, Patients, Remedies, Families.
- Different windows (Tabs)
- Hot keys: Alt 1, Alt 2, Alt 3.
- Check the Default settings for your country (as for the best settings for your country)
- Two methods to save the symptom clipboards (the Analysis)

Introduction part 2

See video: [Introduction part 2](#)

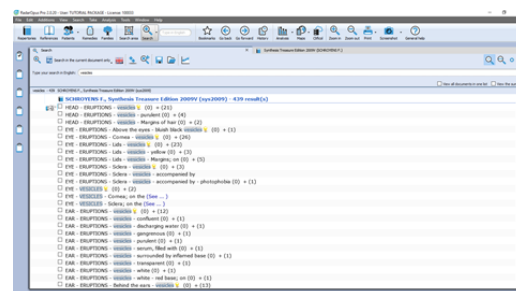

- Find a symptom when you know where it is.
 - with the mouse, with the keyboard
 - take a symptom with drag and drop
- Find a symptom, starting from the current location
 - click on the symptom path
 - use the backspace key

Introduction part 3

See video: [Introduction part 3](#)

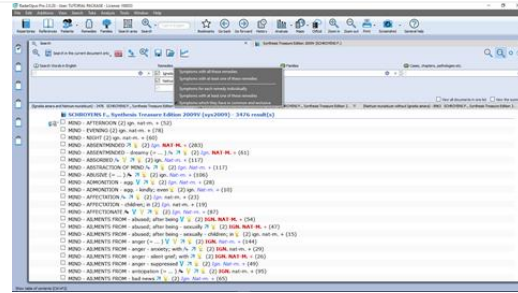

- Simple search on words
- Take a symptom into a clipboard
- Advanced search: word search
- Using more symptom clipboards
- Search in all documents
- Analysis methods
- Save the analysis to a folder.
- Recall the analysis

Introduction part 4

See video: [Introduction part 4](#)

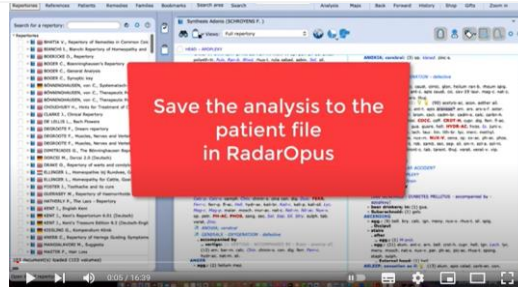

- Remedy search through Synthesis
- Remedy comparison through Synthesis

Introduction part 5

See video: [Introduction part 5](#)

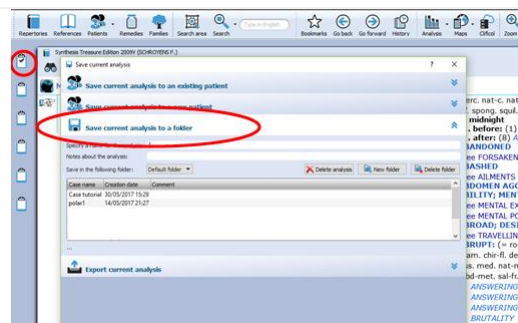

- Save the analysis (clipboards) to the patient file.

Save clipboards separately

See video: [Save clipboards separately](#)

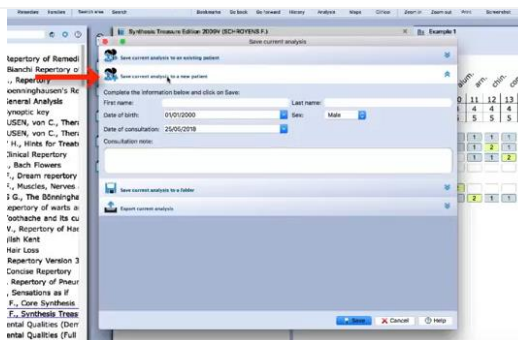

- Save clipboards in a quick way, outside of the patient file, but still securely inside RadarOpus. It is called “save to a folder”.
Have your patient information stored in a secure way.
- Export and send to a colleague (not secure)

An other video which shows how to save the analysis to the patient file

See video: [Save to patient file manually](#)

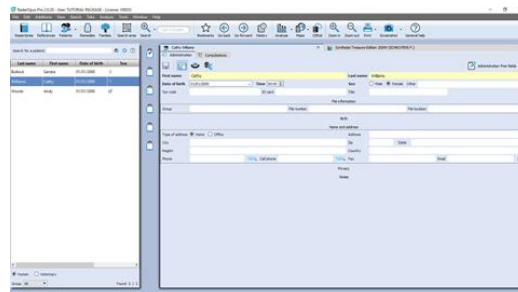

- Save clipboards manually to the patient file.
Have your patient information stored in a secure way.

The patient file basics

See video: [Patient file basics](#)

- The basics how to work with the patient file, and how the symptom clipboards are saved automatically.
Have your patient information stored in a secure way!
